

24-7 Media Technology – Multitouch System

EXHIBIT MT WINDOW

Multitouch Interactive Window is a tracking software that detects multiple users fingers.

Usually it's applied on window stores or specific structure for indoor presentations.

Components

1. Projector (3.000 ansi lumens minimum)
2. Camera (IR Filter)
3. Computer (Dual-Core 2.0 GHz, 2GB Ram, 512MB DDR2 Graphic Card)
4. Led Strip (According to the environment lights (in absence of daylight) it might be necessary to apply it)

Features

- Auto-adaptative daylight conditions;
- Multi-tracking detection;
- Operative System independent;
- User friendly calibration interface;
- Remote interactive contents support.

Content creation

Interactive contents can be developed in several programming languages, because it uses socket communication.

Video, motion graphics, images and sounds can be triggered by **EXHIBIT MT WINDOW**.
