For interactive, multimedia experiences...anywhere.

Want to create a buzz around your trade stand, impress passers by with an interactive, touch controlled information point, but don't yet know about your space, rigging or light conditions? AdTable provides an instant solution.

AdTable is a fully interactive freestanding advertising platform that puts your fingers in control. Activated by touch, AdTable engages with passers by encouraging them to interact with your chosen advertising media. Leaf through interactive brochures, play games, in fact you can use any Windows based applications even browse websites.

AdTable can play music or interactive audio content through built in speakers. It can also be used in any lighting conditions, even outdoors.

Exclusive to 24/7media, Ad Table is available as a flat top table and as a 45 degree lectern version. Custom tables shapes and sizes are also available, for hire and purchase.

Requires just a 1m x 1m operating space. With AdTable, it simply couldn't be easier to add a cutting edge, interactive element to your show, exhibition, launch or event.

Product highlights

- AdTable puts your fingers in control.
- Interactive multimedia experiences can now be enjoyed anywhere.
- Easily create engaging and memorable content using templates.
- Integrated sound effects.
- Screen sizes typically between 32" and 45", however custom sizes and designs are available to order.
- Branded vinyl surrounds the screen to increase customer awareness and encourage interaction.

AdTable can also be connected to other projectors to control larger display on walls.

Creative Solutions and Software Templates

Our unique software templates allow us to quickly create engaging, memorable interactive software from your existing content.

- Turnaround times can meet the most demanding of deadlines.
- We can also design custom applications, incorporating games, data capture, photography and more.
- Because AdTable can also run any Windows based applications the creative possibilities are endless.

Networked Solutions And Database-Driven Content

The AdTable platform is Windows based and extremely versatile. Multiple AdTables can be networked together, remotely managed and centrally updated. AdTable can run database-driven content, particularly useful for interactive catalogues with changing stock levels and product lines.
